DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. An NVM with two memory elements per memory cell.
- II. An NVM with at least three memory elements per memory cell.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

3. The claims are deemed to correspond to the species listed above in the following manner:

- I. claims 1, 3, 5, 7, 9, 11, 13-17
- II. claims 2, 4, 6, 8, 10, 12-17

No claim is generic.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The claimed inventions have mutually exclusive characteristics that would require significantly divergent searches.

5. A telephone call was made to Eric Robinson to request an oral election to the above restriction requirement, but did not result in an election being made.
